

FUNANANI MAVIN TSHIRUFHO

Junior Software Developer | Full-Stack & Backend Development

South Africa | Gauteng | [GitHub](#) | [LinkedIn](#) | Email: marvintshirufho@gmail.com | Phone: +27 71 836 0656

PROFESSIONAL SUMMARY

Information Technology professional with hands-on experience building full-stack web applications and backend services using JavaScript, React, Node.js, Express, PostgreSQL and REST APIs. Strong practical foundation in authentication, authorization, database design, Git-based development, Linux and API integration, with additional cybersecurity experience that strengthens secure software development and troubleshooting. Built portfolio projects including FundBridge, MindMate, and security-focused monitoring/detection systems. Seeking a Junior Software Engineer opportunity where I can contribute to production software while growing across backend, full-stack and cloud engineering.

TECHNICAL SKILLS

Languages: JavaScript, HTML5, CSS3, SQL

Frontend: React, Tailwind CSS, Responsive UI, Component-Based Development

Backend: Node.js, Express.js, RESTful APIs, Authentication & Authorization, JWT

Databases: PostgreSQL, SQLite, Relational Database Design, Prisma ORM

DevOps & Cloud: Git, GitHub, Linux, WSL, Docker, Docker Compose, AWS/S3 concepts, LocalStack

Testing & Tools: Postman, API Testing, Debugging, VS Code

Software Engineering: OOP fundamentals, SDLC, Agile concepts, Clean Code, API Design, Troubleshooting

Security: Burp Suite, Kali Linux, Nmap, Metasploit, Zeek, Web Security Testing, Secure Authentication

SELECTED SOFTWARE DEVELOPMENT PROJECTS

FundBridge: Student Funding Marketplace | React, Node.js, Express, PostgreSQL, Prisma, JWT, AWS S3/LocalStack

- Designed and developed a full-stack platform concept connecting students with sponsors and funding opportunities.
- Implemented role-based workflows, authentication, protected API routes, student profiles, sponsor opportunities and document-related workflows.
- Worked with PostgreSQL and Prisma for relational data modelling and backend persistence; used JWT-based authentication and API authorization.
- Built local cloud-storage testing with S3-compatible LocalStack and Docker-based development services.
- Focused on secure handling of student information, validation, access control and maintainable API architecture.

Shadow AI Detection: Security Monitoring & Detection System | Python, Zeek, SQLite, Web APIs

- Built a security monitoring system designed to identify AI-service usage and potential data exposure from network telemetry.
- Integrated Zeek logs and custom detection logic across DNS, SSL, connection and HTTP telemetry, with deduplication and evidence tracking.
- Added detection concepts for AI API endpoints and unusually large outbound uploads to support security investigation and reporting.
- Developed a dashboard/reporting workflow to surface detections and provide actionable evidence for analysts.

MindMate: Full-Stack Web Application | React, Node.js, Express, PostgreSQL

- Developed a web application with a React frontend and Node/Express backend, integrating API-driven application workflows and persistent data.

- Applied reusable UI components, structured backend routes, database integration and authentication-oriented application patterns.

EDUCATION

Diploma in Information Technology [Richfield Graduate Institute of Technology]

Jan 2023 – Dec 2025 | South Africa

CYBERSECURITY & PRACTICAL LEARNING

Independent Cybersecurity Projects / Bug Bounty Learning | Jan 2024 – Present

Hands-on work with TryHackMe, Advent of Cyber, Burp Suite, Kali Linux, Metasploit, Nmap, VirtualBox and web application security testing. Completed multiple practical security labs and developed security-focused portfolio projects.

ADDITIONAL STRENGTHS

Problem Solving • Analytical Thinking • Debugging & Troubleshooting • Technical Documentation • Self-Directed Learning • Communication • Team Collaboration • Secure Development Mindset • Adaptability

PROFESSIONAL PROFILE

Target roles: Graduate Software Developer | Junior Software Developer | Junior Full-Stack Developer | Junior Backend Developer
